Subject Index of Volume 179

Aluminium
coupled thermodynamic-phase diagram assessment of the rate earth oxide–aluminium oxide binary systems, 259
high temperature interactions in the Fe–Al–C system at 6 GPa pressure, 165
microstructure of β-solution-treated, quenched and aged $\alpha+\beta$ titanium alloy Ti–6A1–1.6Zr–3.30Mo–0.30Si, 125
onset of magnetic correlations in the dilute spin fluctuation systems (La,U)Al_2, 219
Antimony
structural and magnetic studies of $B8_2$-type alloys represented by $Fe_3Ga_{2-x}Sb_x$, 111
Arsenic
neutron diffraction and topographic investigation of the multiphase magnetic transition in MnRhAs, 147

Barium
X-ray structure analysis of twinned single crystals of $Ba_6IrNb_2O_{12}Cl_2$, 187
Beryllium
thermal crystalline-to-amorphous transition of beryllium hydride, 157
Binary systems
coupled thermodynamic-phase diagram assessment of the rare earth oxide–aluminium oxide binary systems, 259
Boron
development of microstructure and preferred orientation of directionally solidified Pr–Fe–B permanent magnet alloy, 61
preparation of neodymium-substituted LaB_6 single crystals by the floating zone method, 201

Cadmium
electric field gradients at ^{111}Cd in $M_2Cu_2O_5$ cuprates (M≡Sc, Y, In, Lu, Yb, Ho, Tb), 307
the enthalpy increments of solid and liquid cadmium di-iodide, 195
Calcium
thermodynamics of formation of high calcium niobates from e.m.f. measurements, L25
Carbon
high temperature interactions in the Fe–Al–C system at 6 GPa pressure, 165
Cerium
compound formation in the Ce_2O_3–SiO_2 system, 77
crystal structure of the compound $Ce_3Pt_4Ge_6$, L7
Cerium
isothermal decomposition behaviour of $CeCo_{5+x}$ compounds, 27
on the properties of $CeFe_2H_x$ hydrided at low temperatures, 99
Chlorine
effect of temperature upon hypersensitive transitions in lanthanides: experimental techniques and preliminary results for the $^4I_{9/2} \rightarrow {}^4G_{5/2}$ transition of $NdCl_6^{3-}$ in chloride melts between ambient and 650 °C, 87
electrodeposition of niobium from fluoroniobate K_2NbF_7 solutions in fused NaCl–KCl, 241
X-ray structure analysis of twinned single crystals of $Ba_6IrNb_2O_{12}Cl_2$, 187
Cobalt
isothermal decomposition behaviour of $CeCo_{5+x}$ compounds, 27
Copper
electric field gradients at ^{111}Cd in $M_2Cu_2O_5$ cuprates (M≡Sc, Y, In, Lu, Yb, Ho, Tb), 307
partial phase diagram of the Ag–Cu–Gd ternary system, L29
Corrosion
characterization of the oxides formed on Zr–2.5wt.%Nb during high temperature corrosion, 207
Crystal
crystal structure and magnetic properties of ternary rare earth compounds of the type RMnGa, 227

preparation of neodymium-substituted LaB_6 single crystals by the floating zone method, 201
X-ray structure analysis of twinned single crystals of $Ba_6IrNb_2O_{12}Cl_2$, 187
crystal structure of the compound $Ce_3Pt_4Ge_6$, L7
luminescence and crystal structure of neodymium and europium squarate hydrates, 13

Diffusion couples
a study of δ'-TiN_{1-x} formation in temperature-gradient diffusion couples, 289

Electro-motive force
thermodynamics of formation of high calcium niobates from e.m.f. measurements, L25
Electrodeposition
electrodeposition of niobium from fluoroniobate K_2NbF_7 solutions in fused NaCl–KCl, 241
Emission spectra
the peculiarities of the emission spectra of gallium garnets, 137
Europium
luminescence and crystal structure of neodymium and europium squarate hydrates, 13

Fluorine
electrodeposition of niobium from fluoroniobate K_2NbF_7 solutions in fused NaCl–KCl, 241

Gadolinium
crystal structure and magnetic properties of ternary rare earth compounds of the type RMnGa, 227
partial phase diagram of the Ag–Cu–Gd ternary system, L29
thermodynamic properties of scandium, lanthanum, neodymium and gadolinium silicides and germanides, 299
Gallium
structural and magnetic studies of $B8_2$-type alloys represented by $Fe_3Ga_{2-x}Sb_x$, 111
the peculiarities of the emission spectra of gallium garnets, 137
Germanium
crystal structure of the compound $Ce_3Pt_4Ge_6$, L7

Hydrates
luminescence and crystal structure of neodymium and europium squarate hydrates, 13
Hydrides
compressibility of dihydrides of transition metals, 253
isothermal compression study of 3d and 4d transition metal dihydrides. II: Compression of $ZrH_{1.99}$ up to 18 GPa, 73
isothermal compression study of 3d and 4d transition metal dihydrides. I: Compression of ScH_2 up to 27 GPa, 69
magnetic properties of nickel hydride — a comparison of magnetic susceptibility with band structure calculations, 339
thermal crystalline-to-amorphous transition of beryllium hydride, 157
Hydrogen
Gorsky effect origins of uphill hydrogen diffusion in $Pd_{81}Pt_{19}$, $Pd_{77}Ag_{23}$ and palladium membranes, L13
on the properties of $CeFe_2H_x$ hydrided at low temperatures, 99
Hypersensitive transitions
effect of temperature upon hypersensitive transitions in lanthanides: experimental techniques and preliminary results for the $^4I_{9/2} \rightarrow {}^4G_{5/2}$ transition of $NdCl_6^{3-}$ in chloride melts between ambient and 650 °C, 87

Iodine
the enthalpy increments of solid and liquid cadmium di-iodide, 195
Iron
development of microstructure and preferred orientation of directionally solidified Pr–Fe–B permanent magnet alloy, 61
high temperature interactions in the Fe–Al–C system at 6 GPa pressure, 165
on the properties of $CeFe_2H_x$ hydrided at low temperatures, 99
X-ray structure analysis of twinned single crystals of $Ba_6IrNb_2O_{12}Cl_2$, 187
structural and magnetic studies of $B8_2$-type alloys represented by $Fe_3Ga_{2-x}Sb_x$, 111

Isothermal compression
isothermal compression study of 3d and 4d transition metal dihydrides. II: Compression of $ZrH_{1.99}$ up to 18 GPa, 73
isothermal compression study of 3d and 4d transition metal dihydrides. I: Compression of ScH_2 up to 27 GPa, 69
Isothermal decomposition
isothermal decomposition behaviour of $CeCo_{5+x}$ compounds, 27

Lanthanum
onset of magnetic correlations in the dilute spin fluctuation systems $(La,U)Al_2$, 219
preparation of neodymium-substituted LaB_6 single crystals by the floating zone method, 201
thermodynamic properties of scandium, lanthanum, neodymium and gadolinium silicides and germanides, 299
Lithium
$(Li_{1-x}NI_x)Li_4Sr_2N_3$: an "intergrowth-structure" of $(Li_{1-x}Ni_x)SrN$ and Li_4SrN_2, 333
Luminescence
luminescence and crystal structure of neodymium and europium squarate hydrates, 13

Magnetic correlations
onset of magnetic correlations in the dilute spin fluctuation systems $(La,U)Al_2$, 219
Magnetic properties
crystal structure and magnetic properties of ternary rare earth compounds of the type RMnGa, 227
magnetic properties of nickel hydride — a comparison of magnetic susceptibility with band structure calculations, 339
structural and magnetic studies of $B8_2$-type alloys represented by $Fe_3Ga_{2-x}Sb_x$, 111
Magnetic transition
neutron diffraction and topographic investigation of the multiphase magnetic transition in MnRhAs, 147
Manganese
crystal structure and magnetic properties of ternary rare earth compounds of the type RMnGa, 227
electric field gradients at ^{111}Cd in $M_2Cu_2O_5$ cuprates (M ≡ Sc, Y, In, Lu, Yb, Ho, Tb), 307
neutron diffraction and topographic investigation of the multiphase magnetic transition in MnRhAs, 147
the phase transition in palladium–manganese alloys with up to 33.3 at.% Mn, 321
Mass spectrometry
uranium activity of uranium-rich U–Zr alloys by Knudsen effusion mass spectrometry, L21
Microstructure
development of microstructure and preferred orientation of directionally solidified Pr–Fe–B permanent magnet alloy, 61
Molybdenum
microstructure of β-solution-treated, quenched and aged $\alpha+\beta$ titanium alloy Ti–6A1–1.6Zr–3.30Mo–0.30Si, 125
Morphology
morphological characteristics observed from the oxidation of nobium. I: Morphological evolution in relation to temperature, 1

Neobium
X-ray structure analysis of twinned single crystals of $Ba_6IrNb_2O_{12}Cl_2$, 187
Neodymium
effect of temperature upon hypersensitive transitions in lanthanides: experimental techniques and preliminary results for the $^4I_{9/2} \rightarrow {}^4G_{5/2}$ transition of $NdCl_6^{3-}$ in chloride melts between ambient and 650 °C, 87
luminescence and crystal structure of neodymium and europium squarate hydrates, 13
preparation of neodymium-substituted LaB_6 single crystals by the floating zone method, 201
thermodynamic properties of scandium, lanthanum, neodymium and gadolinium silicides and germanides, 299
Neutron diffraction
neutron diffraction and topographic investigation of the multiphase magnetic transition in MnRhAs, 147

Nickel
a thermodynamic calculation of the Ni–Nb phase diagram, 177
magnetic properties of nickel hydride – a comparison of magnetic susceptibility with band structure calculations, 339
$(Li_{1-x}Ni_x)Li_4Sr_2N_3$: an "intergrowth-structure" of $(Li_{1-x}Ni_x)SrN$ and Li_4SrN_2, 333
Niobates
thermodynamics of formation of high calcium niobates from e.m.f. measurements, L25
Niobium
a thermodynamic calculation of the Ni–Nb phase diagram, 177
characterization of the oxides formed on Zr–2.5wt.%Nb during high temperature corrosion, 207
determination of the Gibbs energy of solution of oxygen in niobium, L1
electrodeposition of niobium from fluoroniobate K_2NbF_7 solutions in fused NaCl–KCl, 241
isothermal sections of the Pd–Pt–Nb and Pd–Pt–Ta systems at 1000 °C, 141
morphological characteristics observed from the oxidation of nobium. I: Morphological evolution in relation to temperature, 1
Nitrogen
a study of δ'-TiN_{1-x} formation in temperature-gradient diffusion couples, 289
$(Li_{1-x}Ni_x)Li_4Sr_2N_3$: an "intergrowth-structure" of $(Li_{1-x}Ni_x)SrN$ and Li_4SrN_2, 333

Oxidation
morphological characteristics observed from the oxidation of nobium. I: Morphological evolution in relation to temperature, 1
Oxides
characterization of the oxides formed on Zr–2.5wt.%Nb during high temperature corrosion, 207
coupled thermodynamic-phase diagram assessment of the rare earth oxide–aluminium oxide binary systems, 259
Oxygen
compound formation in the $Ce_2O_3-SiO_2$ system, 77
determination of the Gibbs energy of solution of oxygen in niobium, L1
electric field gradients at ^{111}Cd in $M_2Cu_2O_5$ cuprates (M ≡ Sc, Y, In, Lu, Yb, Ho, Tb), 307
X-ray structure analysis of twinned single crystals of $Ba_6IrNb_2O_{12}Cl_2$, 187

Palladium
Gorsky effect origins of uphill hydrogen diffusion in $Pd_{81}Pt_{19}$, $Pd_{77}Ag_{23}$ and palladium membranes, L13
isothermal sections of the Pd–Pt–Nb and Pd–Pt–Ta systems at 1000 °C, 141
the phase transition in palladium–manganese alloys with up to 33.3 at.% Mn, 321
on the synthesis and structure of Rb_3PdH_3 and Rb_3PdH_5, 235
Phase diagrams
a thermodynamic calculation of the Ni–Nb phase diagram, 177
coupled thermodynamic-phase diagram assessment of the rare earth oxide–aluminium oxide binary systems, 259
partial phase diagram of the Ag–Cu–Gd ternary system, L29
Phase transition
the phase transition in palladium—manganese alloys with up to 33.3 at.% Mn, 321
Platinum
crystal structure of the compound $Ce_3Pt_4Ge_6$, L7
Gorsky effect origins of uphill hydrogen diffusion in $Pd_{81}Pt_{19}$, $Pd_{77}Ag_{23}$ and palladium membranes, L13
isothermal sections of the Pd–Pt–Nb and Pd–Pt–Ta systems at 1000 °C, 141
Potassium
electrodeposition of niobium from fluoroniobate K_2NbF_7 solutions in fused NaCl–KCl, 241
Praseodymium
development of microstructure and preferred orientation of directionally solidified Pr–Fe–B permanent magnet alloy, 61

Rare earth
coupled thermodynamic-phase diagram assessment of the rare earth oxide–aluminium oxide binary systems, 259
crystal structure and magnetic properties of ternary rare earth compounds of the type RMnGa, 227
Rhodium
neutron diffraction and topographic investigation of the multiphase magnetic transition in MnRhAs, 147
Rubidium
on the synthesis and structure of Rb_3PdH_3 and Rb_3PdH_5, 235

Scandium
thermodynamic properties of scandium, lanthanum, neodymium and gadolinium silicides and germanides, 299
Silicon
compound formation in the $Ce_2O_3-SiO_2$ system, 77
microstructure of β-solution-treated, quenched and aged $\alpha+\beta$ titanium alloy Ti–6Al–1.6Zr–3.30Mo–0.30Si, 125
Silver
Gorsky effect origins of uphill hydrogen diffusion in $Pd_{81}Pt_{19}$, $Pd_{77}Ag_{23}$ and palladium membranes, L13
partial phase diagram of the Ag–Cu–Gd ternary system, L29
Strontium
$(Li_{1-x}Ni_x)Li_4Sr_2N_3$: an "intergrowth-structure" of $(Li_{1-x}Ni_x)SrN$ and Li_4SrN_2, 333
Structure
structural and magnetic studies of $B8_2$-type alloys represented by $Fe_3Ga_{2-x}Sb_x$, 111
on the synthesis and structure of Rb_3PdH_3 and Rb_3PdH_5, 235
$(Li_{1-x}Ni_x)Li_4Sr_2N_3$: an "intergrowth-structure" of $(Li_{1-x}Ni_x)SrN$ and Li_4SrN_2, 333
Synthesis
on the synthesis and structure of Rb_3PdH_3 and Rb_3PdH_5, 235

Tantalum
isothermal sections of the Pd–Pt–Nb and Pd–Pt–Ta systems at 1000 °C, 141
Tellurium
an investigation of the tellurium-rich uranium tellurides using X-ray powder diffraction, 37
Ternary phases
new ternary Laves phases, L33
Thermal transition
thermal crystalline-to-amorphous transition of beryllium hydride, 157
Thermodynamics
a thermodynamic calculation of the Ni–Nb phase diagram, 177
coupled thermodynamic-phase diagram assessment of the rare earth oxide–aluminium oxide binary systems, 259
thermodynamic properties of scandium, lanthanum, neodymium and gadolinium silicides and germanides, 299
thermodynamics of formation of high calcium niobates from e.m.f. measurements, L25
Titanium
a study of δ'-TiN_{1-x} formation in temperature-gradient diffusion couples, 289
microstructure of β-solution-treated, quenched and aged $\alpha+\beta$ titanium alloy Ti–6Al–1.6Zr–3.30Mo–0.30Si, 125
Transition metal
compressibility of dihydrides of transition metals, 253
isothermal compression study of 3d and 4d transition metal dihydrides. II: Compression of $ZrH_{1.99}$ up to 18 GPa, 73
isothermal compression study of 3d and 4d transition metal dihydrides. I: Compression of ScH_2 up to 27 GPa, 69

Uranium
an investigation of the tellurium-rich uranium tellurides using X-ray powder diffraction, 37
onset of magnetic correlations in the dilute spin fluctuation systems $(La,U)Al_2$, 219
uranium activity of uranium-rich U–Zr alloys by Knudsen effusion mass spectrometry, L21

X-ray diffraction
an investigation of the tellurium-rich

uranium tellurides using X-ray powder diffraction, 37

Zirconium
characterization of the oxides formed on Zr–2.5wt.%Nb during high temperature corrosion, 207
microstructure of β-solution-treated, quenched and aged $\alpha+\beta$ titanium alloy Ti–6Al–1.6Zr–3.30Mo–0.30Si, 125
uranium activity of uranium-rich U–Zr alloys by Knudsen effusion mass spectrometry, L21
